

NITE OWL

SAFETY NEVER SLEEPS

SOFTWARE TO REDUCE PLANT RISK AND IMPROVE PRODUCTIVITY

At Nite Owl Software, we develop and manage software for energy facilities. Our system is designed for plant environments where dangerous conditions exist and safety is paramount. Our tool is currently operational in a variety of energy facilities including: Gas,

Wind, Hydro, Biomass, and Battery/Energy Storage. The Nite Owl system creates documentation for compliance needs including safety permits that meet OSHA requirements, while also reducing risks and improving internal staff efficiency.

Our Clients:

SYSTEM FEATURES

LOCKOUT & TAGOUT

WORK AUTHORIZATION FORM AND SAFE WORK PERMIT

JOB SAFETY ANALYSIS

HOT WORK PERMIT

CONFINED SPACE ENTRY PERMIT

ENERGIZED ELECTRICAL PERMIT

LOCKOUT & TAGOUT STANDARDS AND TEMPLATES

AREA HAZARD ASSESSMENT

Nite Owl's system features are all built around the most important safety permitting processes. Modules and features can be turned on/off or modified, depending on the needs of the facility. The software is a combination of central workflow and permit integration.

The system utilizes standards or templates that greatly speed up input of repetitive tasks. The current status (approved, issued, closed) of all permits are easily viewed in a variety of ways including an overlay on a facility map. It provides access to reporting, print integration and indexing. Plus the system keeps a data log for all actions after a safety permit has been initiated.

POWER GENERATION PLANTS AND FACILITIES

REDUCE PLANT RISK AND IMPROVE PRODUCTIVITY WHERE AND WHEN SAFETY IS MISSION CRITICAL

SYSTEM TECH SPECS

- Built on Microsoft Platform
- Microsoft SQL Server Database

NEW SOFTWARE FEATURES

- Facility Site Mapping Key
- Dashboard Overview & Status
- Tag Printing Functionality

SINCE 2008, NITE OWL HAS BEEN SERVING THE POWER GENERATION INDUSTRY WITH SUPPORT FROM REAL HUMANS. PUT OUR 15+ YEARS OF EXPERIENCE TO WORK IN YOUR PLANT OR FACILITY.
